CERTIFICATE

OVERVIEW

A newsletter is a printed or electronic report containing news concerning of the activities of a business or an organization that is sent to its members, customers, employees or other subscribers. Newsletters generally contain one main topic of interest to its recipients. A newsletter may be considered grey literature. E-newsletters are delivered electronically via e-mail and can be viewed as spamming if e-mail marketing is sent unsolicited.

INTRODUCTION ABOUT THE COURSE

It's a 50+ hours Web Development course the most comprehensive web development course available online. Even if you have zero programming experience, this course will take you from beginner to mastery. Here's why:

- The course is taught by the lead instructor at the App Brewery, London's leading in-person programming bootcamp.
- The course has been updated to be 2020 ready and you'll be learning the latest tools and technologies used at large companies such as Apple, Google and Netflix.
- This course doesn't cut any corners, there are beautiful animated explanation videos and tens of real-world projects which you will get to build.
- The curriculum was developed over a period of four years, with comprehensive student testing and feedback.

In this course we learnt many Web development languages few of them are mention below -:

- HTML 5
- CSS 3
- Bootstrap 4
- JavascriptES6
- DOM Manipulation
- jQuery
- Bash Command Line

- Git, GitHub and Version Control
- Node.js
- NPM
- Express.js
- APIs
- Databases
- React.js
- Web Design

INTRODUCTION

In this project we are making a sign in for NEWSLETTER .What we are doing is we collect the name of the user and his mail id .Using Mailchimp's API store that data on the server and use that mail id to update its members, customers, employees or other subscribers.

Basically a Newsletters generally contain one main topic of interest to its recipients. A newsletter may be considered grey literature. E-newsletters are delivered electronically via e-mail and can be viewed as spamming if e-mail marketing is sent unsolicited.

Ones they subscribed the user they will receive update regarding any new information of data that the organisation want to send to them. They can unsubscribe the NEWSLETTER by just contacting the organization through mail or any other social media platforms.

PROJECT OBJECTIVE

Talk to any marketer these days and you'll be told the same thing: You need an email list and you need to work hard at building that list.

Part of building a successful list is sending regular email newsletters. The purpose of an email newsletter is to give those on your list updates pertaining to your business, products, and services. However, it's not something that's generally used for a hard sell. An email newsletter should feel like an update from an interesting, helpful friend, rather than a pushy salesperson. That's not to say that these newsletters are simply used to keep in touch.

They can be used to motivate your customers to take action, like making a purchase or checking out your latest blog post. Newsletter are often the life force of your marketing campaign. Over the past decade, email marketing has proven to be significantly more successful than social media marketing.

US customer-acquisition growth by channel,
% of customers acquired

Source: Custora, *E-Commerce Customer Acquisition Snapshot*, 2013; McKinsey iConsumer survey, 2012

According to McKinsey researchers, you're 40 times more likely to get new customer from email marketing than from Facebook or Twitter.

FUNCTIONALITY

Newsletters keep customers and prospects up to date with developments in your company. By selecting the right content, you can keep your audience informed on topics such as new products, special promotional offers and your company's participation in exhibitions and conferences.

We can also use newsletters to inform customers about your financial results and any important executive, sales or customer service appointments. Keeping customers informed about developments ensures that they are aware of your company's status as an innovative, well-managed supplier.

SYSTEM SPECIFICATIONS

HARDWARE REQUIREMENT -:

- Processor: Minimum 1 GHz; Recommended 2GHz or more.
- Ethernet connection (LAN) OR a wireless adapter (Wi-Fi)
- Hard Drive: Minimum 32 GB; Recommended 512 GB or more.
- Memory (RAM): Minimum 1 GB; Recommended 4 GB or above.

SOFTWARE REQUIREMENT -:

- Browser (google chrome, firefox, etc)
- Adobe flash player
- Adobe Reader
- Javascript enabled in browser.

TOOLS AND PLATFORM

Tools and platform Used are -:

- Code Editor
- Browser
- Basic Laptop
- Internet connection
- Hyper

Software used -:

- Html
- Css
- Bootstrap
- Javascript
- Node
- Express

LEARNING OUTCOME

- Understand the principles of creating an effective web page, including an in-depth consideration of information architecture.
- Become familiar with graphic design principles that relate to web design and learn how to implement theories into practice.
- Develop skills in analyzing the usability of a web site.
- Understand how to plan and conduct user research related to web usability.
- Learn how to utilize different languages of web.
- Learn techniques of responsive web design, including media queries.
- Develop basic programming skills using Javascript and jQuery.
- Learn about the use of APIs .

LIMITATIONS OF NEWSLETTER

- Partly low opening rate: Not every newsletter is read. Especially if someone has subscribed to many newsletters.
- Time: a newsletter must also be written. Even if you can keep the effort low if you do it skill fully.
- Little success if the content is not interesting for readers and offers no added value.
- If you offer something that your readers urgently need, a newsletter is usually not worth it. Because they want it right now.

FUTURE SCOPE OF PROJECT

Email is most common thing which almost every person have whether it's a student or a business man. Newsletter use Email as source to interact with different user to share information among subscriber.

As the growth of society increases there are more people who are surfing through the internet and approx. more than 40 times there is a possibility of getting new customer from email marketing than from Facebook or Twitter.

Chat bot can be used in future to improve user interaction with the website along with that we can add many section regarding the organization which are sending Newsletters. Database can be used to store more detailed information of the user like birthday date, preferences, locality ,etc. we can also change the layout so that user can have a smooth interaction with the website.

CODE

Html Files

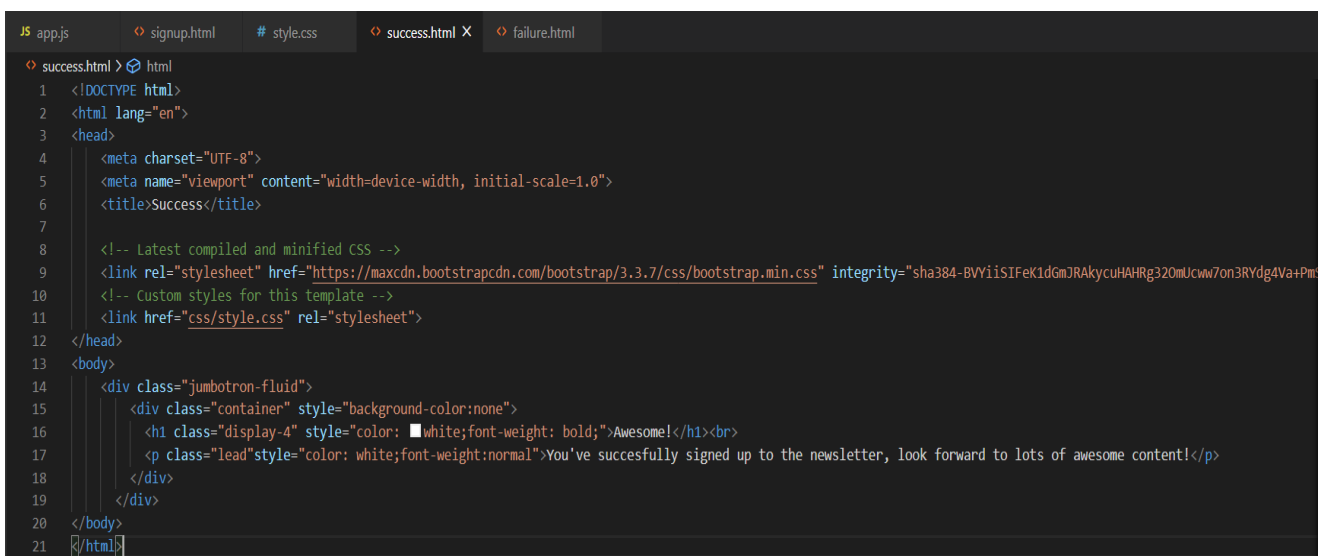

1. Sign up file

```
JS app.js  signup.html X  # style.css  success.html  failure.html
<!-- signup.html -->
1
2 <!doctype html>
3 <html lang="en">
4

45 <p><i class="fa fa-twitter footer-icon"></i> <i class="fa fa-facebook footer-icon"></i> <i class="fa fa-instagram footer-icon"></i> <i class="fa fa-envelope footer-icon"></i></p>
46
47 </footer>
48
49 </body>
50 </html>
51
```

Sign up file is for home page where user will sign up in our Newsletter.

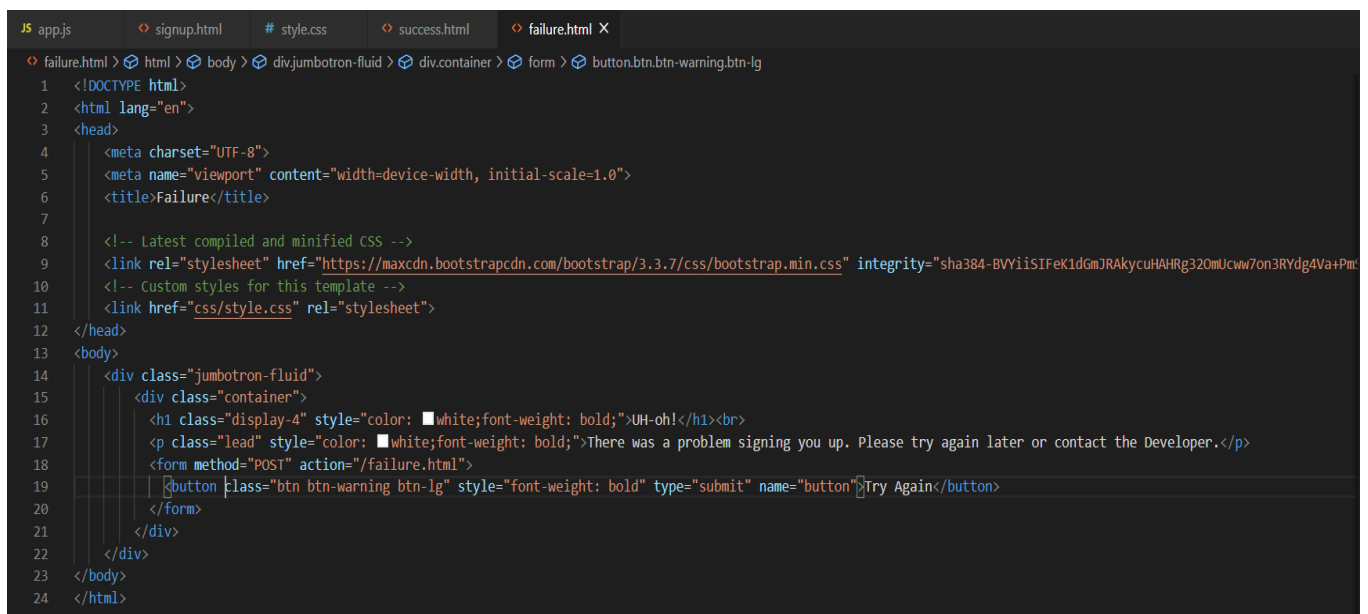

2. Success file

```
1 <!DOCTYPE html>
2 <html lang="en">
3 <head>
4   <meta charset="UTF-8">
5   <meta name="viewport" content="width=device-width, initial-scale=1.0">
6   <title>Success</title>
7
8   <!-- Latest compiled and minified CSS -->
9   <link rel="stylesheet" href="https://maxcdn.bootstrapcdn.com/bootstrap/3.3.7/css/bootstrap.min.css" integrity="sha384-BVYiiSIFeK1dGmJRAKycuHAHRg320mUcww7on3RYdg4Va+Pm" />
10  <!-- Custom styles for this template -->
11  <link href="css/style.css" rel="stylesheet">
12 </head>
13 <body>
14   <div class="jumbotron-fluid">
15     <div class="container" style="background-color:none">
16       <h1 class="display-4" style="color: white;font-weight: bold;">Awesome!</h1><br>
17       <p class="lead" style="color: white;font-weight:normal">You've succesfully signed up to the newsletter, look forward to lots of awesome content!</p>
18     </div>
19   </div>
20 </body>
21 </html>
```

Success file is made so that after success fully sign up in our newsletter user get an update of successfully sign in up.

3. Failure file

```
JS app.js  failure.html  signup.html  style.css  success.html  failure.html X
failure.html > html > body > div.jumbotron-fluid > div.container > form > button.btn.btn-warning.btn-lg
1 <!DOCTYPE html>
2 <html lang="en">
3 <head>
4   <meta charset="UTF-8">
5   <meta name="viewport" content="width=device-width, initial-scale=1.0">
6   <title>Failure</title>
7
8   <!-- Latest compiled and minified CSS -->
9   <link rel="stylesheet" href="https://maxcdn.bootstrapcdn.com/bootstrap/3.3.7/css/bootstrap.min.css" integrity="sha384-BVYiiSIFeK1dGmJRAKycuHAHRg320mUcw7on3RYdg4Va+Pm"
10  <!-- Custom styles for this template -->
11   <link href="css/style.css" rel="stylesheet">
12 </head>
13 <body>
14   <div class="jumbotron-fluid">
15     <div class="container">
16       <h1 class="display-4" style="color: white;font-weight: bold;">UH-oh!</h1><br>
17       <p class="lead" style="color: white;font-weight: bold;">There was a problem signing you up. Please try again later or contact the Developer.</p>
18       <form method="POST" action="/failure.html">
19         <button class="btn btn-warning btn-lg" style="font-weight: bold" type="submit" name="button">Try Again</button>
20       </form>
21     </div>
22   </div>
23 </body>
24 </html>
```

Somehow if there is a failure during sign in process whether due to API or not getting any response this file will show along with a message and a button to allow the user to retry even if it doesn't work ,then user can contact the developer.

Java Script file

```
JS app.js × <> signup.html # style.css <> success.html <> failure.html
JS app.js > app.post("/") callback
1 //jshint esversion: 6
2 const express = require("express");
3 const bodyParser = require("body-parser");
4 const request = require("request");
5 const https = require("https");
6
7 const app = express();
8 app.use(express.static("public"));
9 app.use(bodyParser.urlencoded({extended:true}));
10 app.get("/",function(req,res){
11     res.sendFile(__dirname+"/signup.html");
12 });
13 app.post("/",function(req,res){
14     const firstName = req.body.fname;
15     const lastName = req.body.lname;
16     const email = req.body.email;
17
18     const data = {
19         members:[{
20             email_address: email,
21             status: "subscribed",
22             merge_fields: {
23                 FNAME: firstName,
24                 LNAME: lastName
25             }
26         }]
27     };
28
```

```

28
29     const jsonData = JSON.stringify(data);
30     const url = "https://us17.api.mailchimp.com/3.0/lists/696ecc20c7";
31     const options = {
32         method: "POST",
33         auth: "Ritik:ac695e90786d5c8ac4175146ce82c1c8-us17"
34     }
35     const request= https.request(url,options,function(response) {
36         if(response.statusCode === 200){
37             res.sendFile(__dirname+"/success.html");
38         }
39         else
40         {
41             res.sendFile(__dirname+"/failure.html");
42         }
43     })
44     app.post("/failure.html",function(req,res){
45         res.redirect("/");
46     })
47     request.write(jsonData);
48     request.end();
49 })
50
51
52 app.listen(3000, function(){
53     console.log("Server is running at port 3000");
54 });

```

Both the above screen shot are a complete js file in which ,with the help of js frame work node and express we are able to send data to the mailchimp server using their API. we also used few node module using npm install .

CSS file

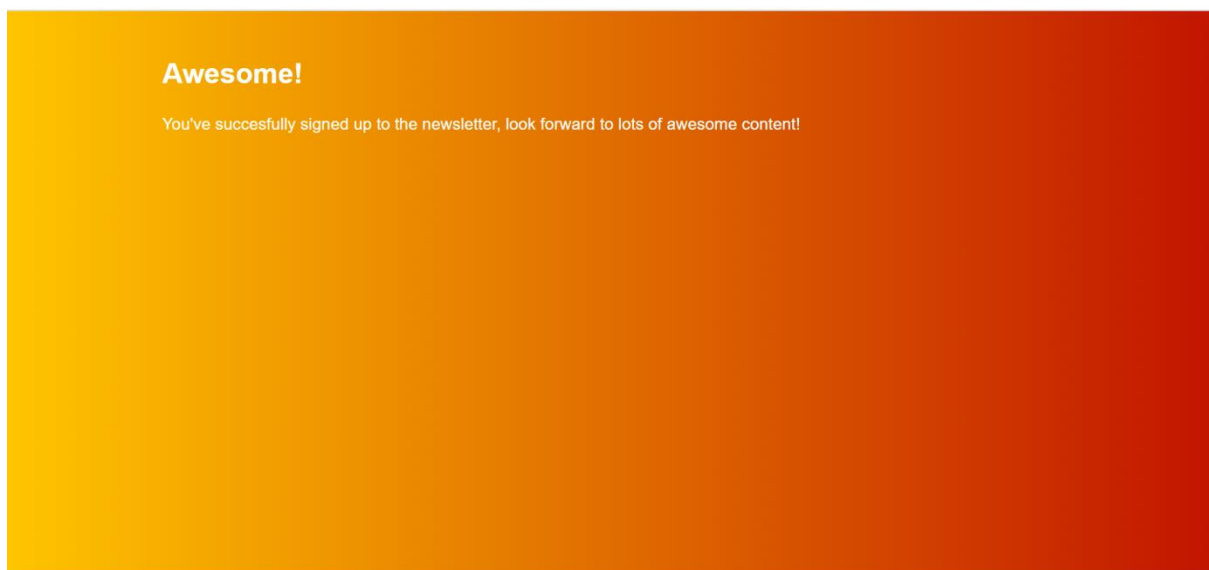

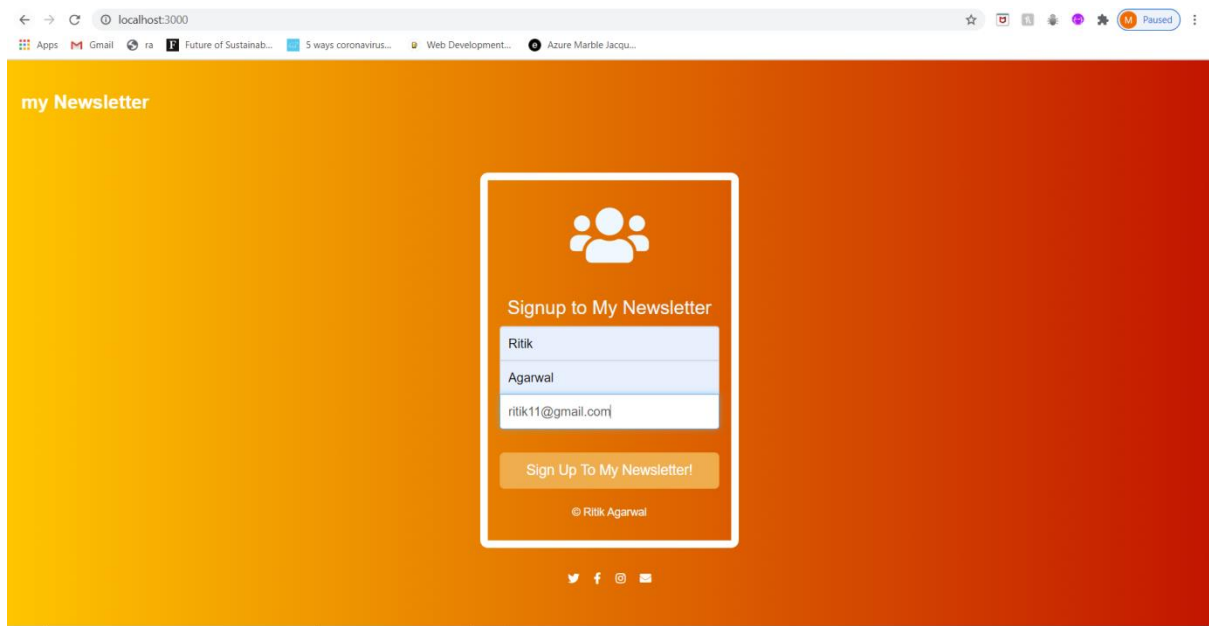

```
JS app.js  <> signup.html  # style.css  X  <> success.html  <> failure.html
public > css > # style.css > html
1  html,
2  body {
3    height: 100%;
4    background: #c21500;
5    background: -webkit-linear-gradient(to right, #ffc500, #c21500);
6    background: linear-gradient(to right, #ffc500, #c21500);
7  }
8
9  body {
10   align-items: center;
11   padding-top: 40px;
12   padding-bottom: 40px;
13   background-color: #f5f5f5;
14 }
15
16 .form-signin {
17   width: 100%;
18   max-width: 330px;
19   padding: 15px;
20   margin: auto;
21   border: 1rem solid white;
22   border-radius: 1rem;
23 }
24 .form-signin .checkbox {
25   font-weight: 400;
26 }
27 .form-signin .form-control {
28   position: relative;
29   box-sizing: border-box;
30   height: auto;
31   padding: 10px;
32   font-size: 16px;
33 }
34 .form-signin .form-control:focus {
35   z-index: 2;
36 }
```

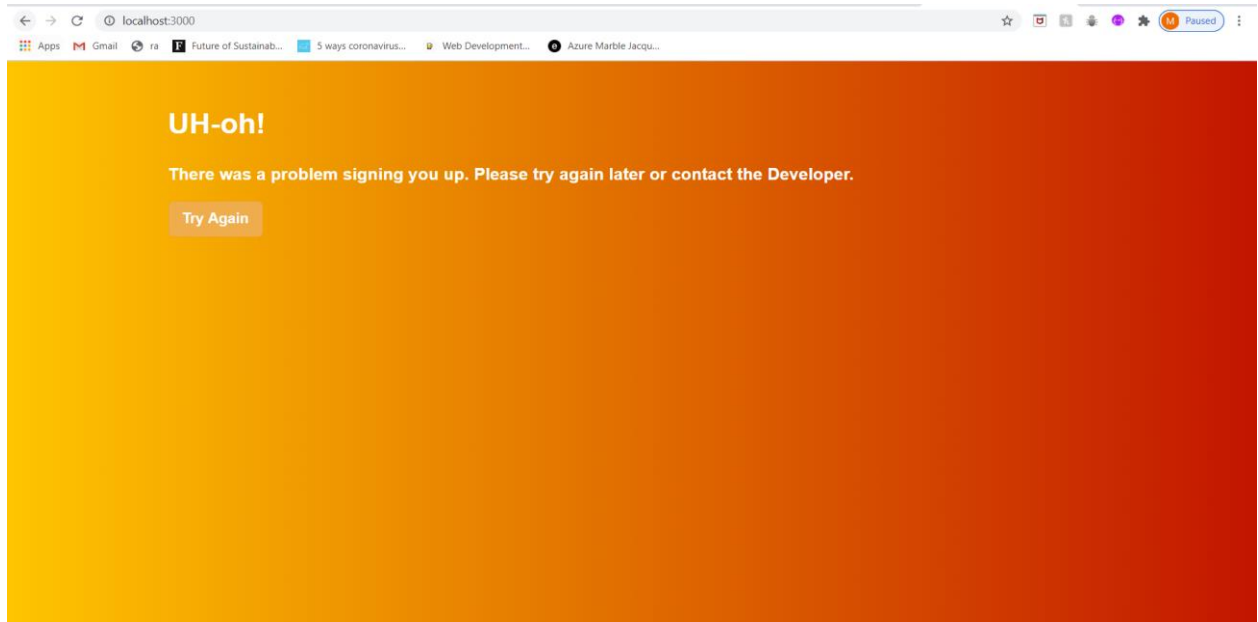

```
37  ∨ .top{
38    |   margin-bottom: -1px;
39    |   border-bottom-right-radius: 0;
40    |   border-bottom-left-radius: 0;
41    | }
42    .middle
43  ∨ {
44    |   border-radius: 0;
45    |   margin-bottom: -1px;
46    | }
47  ∨ .bottom{
48    |   margin-bottom: 10px;
49    |   border-top-left-radius: 0;
50    |   border-top-right-radius: 0;
51    | }
52  ∨ .fa{
53    |   padding: 0px .75rem;
54    | }
```

Both the above screen shot is of single css file name style.css . This file contains all the styling of the 3 Html file .

3. Mail Chimp Data Received

The screenshot shows the Mailchimp 'Audience' page for a specific list. The URL in the browser is `us17.admin.mailchimp.com/lists/members?id=223182#p:1-s:25-sa:last_update_time-so:false`. The navigation bar includes 'Create', 'Audience', 'Campaigns', 'Automations', 'Website', 'Content Studio', and 'Integrations'. A 'News Feed' section states: 'Your audience has 1 contacts. 1 of these are subscribers.' Below this is a menu with 'Overview', 'Manage contacts', 'Add contacts', 'Signup forms', 'Settings', 'Conversations', and 'Surveys'. On the right, there are buttons for 'Toggle Columns' and 'Export Audience'. The main table displays contact information with columns: Email Address, First Name, Last Name, Address, Phone Number, Birthday, Tags, Email Marketing, Source, Contact Rating, and a 'D' column. One contact is listed: Ritik Agarwal, with email `ritik11@gmail.com`, status 'Subscribed', source 'API', and a 5-star rating.

	Email Address	First Name	Last Name	Address	Phone Number	Birthday	Tags	Email Marketing	Source	Contact Rating	D
<input type="checkbox"/>	<code>ritik11@gmail.com</code>	Ritik	Agarwal					Subscribed	API	★★★★★	9
